

Certification Program in

Visual Communication & Media Art

DESIGNED BY INDUSTRY EXPERTS,
TAILORED FOR REAL-WORLD PLACEMENTS.

www.tutopiapro.com

Empowering Today's students for a competitive tomorrow

Tutopia-Pro is your gateway to bridging the gap between academic learning and real-world industry demands. With expert-led courses designed in collaboration with industry professionals, we prepare UG and PG students to excel in a competitive job market. Our focus on hands-on training, paid internships and placement assistance ensures enhanced career prospects. Understanding the comfort of students from West Bengal with learning in their mother tongue, Tutopia-Pro delivers complex concepts in the vernacular, making professional education accessible and impactful for all.

Your Schedule. Their Expertise. Tutopia-Pro's Unique Approach

Tutopia-Pro's online classes are designed with complete flexibility, seamlessly fitting into your daily routine. Whether you have university, college, or personal commitments, our class timings ensure there are no clashes. This flexibility also allows our expert industry professionals to conveniently share their valuable real-world experience, enriching your learning journey.

Tutopia-Pro's non-conflicting course timing.

Batch 1: 8 PM-10 PM

Batch 2: 10 PM-12 MIDNIGHT

Transforming education with the Flip Method of teaching

In conventional classrooms, students often struggle to grasp new concepts without prior exposure. Post-class doubts remain unresolved, making subjects more complex over time. With the Flip Method, learning starts before the class itself. Students watch video tutorials in the app, gaining a solid foundation of the topics before attending live sessions.

HOW IT WORKS

1

PRE-CLASS PREPARATION

Video tutorials are designed to give students a solid foundation by covering essential topics before the live classes. This helps students come to the live sessions with a basic understanding of the subjects, allowing them to focus on clarifying their doubts during the online live classes.

INTERACTIVE LIVE CLASSES

After watching the subject videos during pre-class preparation, students come to the live sessions ready to engage. They can ask specific questions, clear their doubts and have meaningful discussions with their expert teachers.

2

3

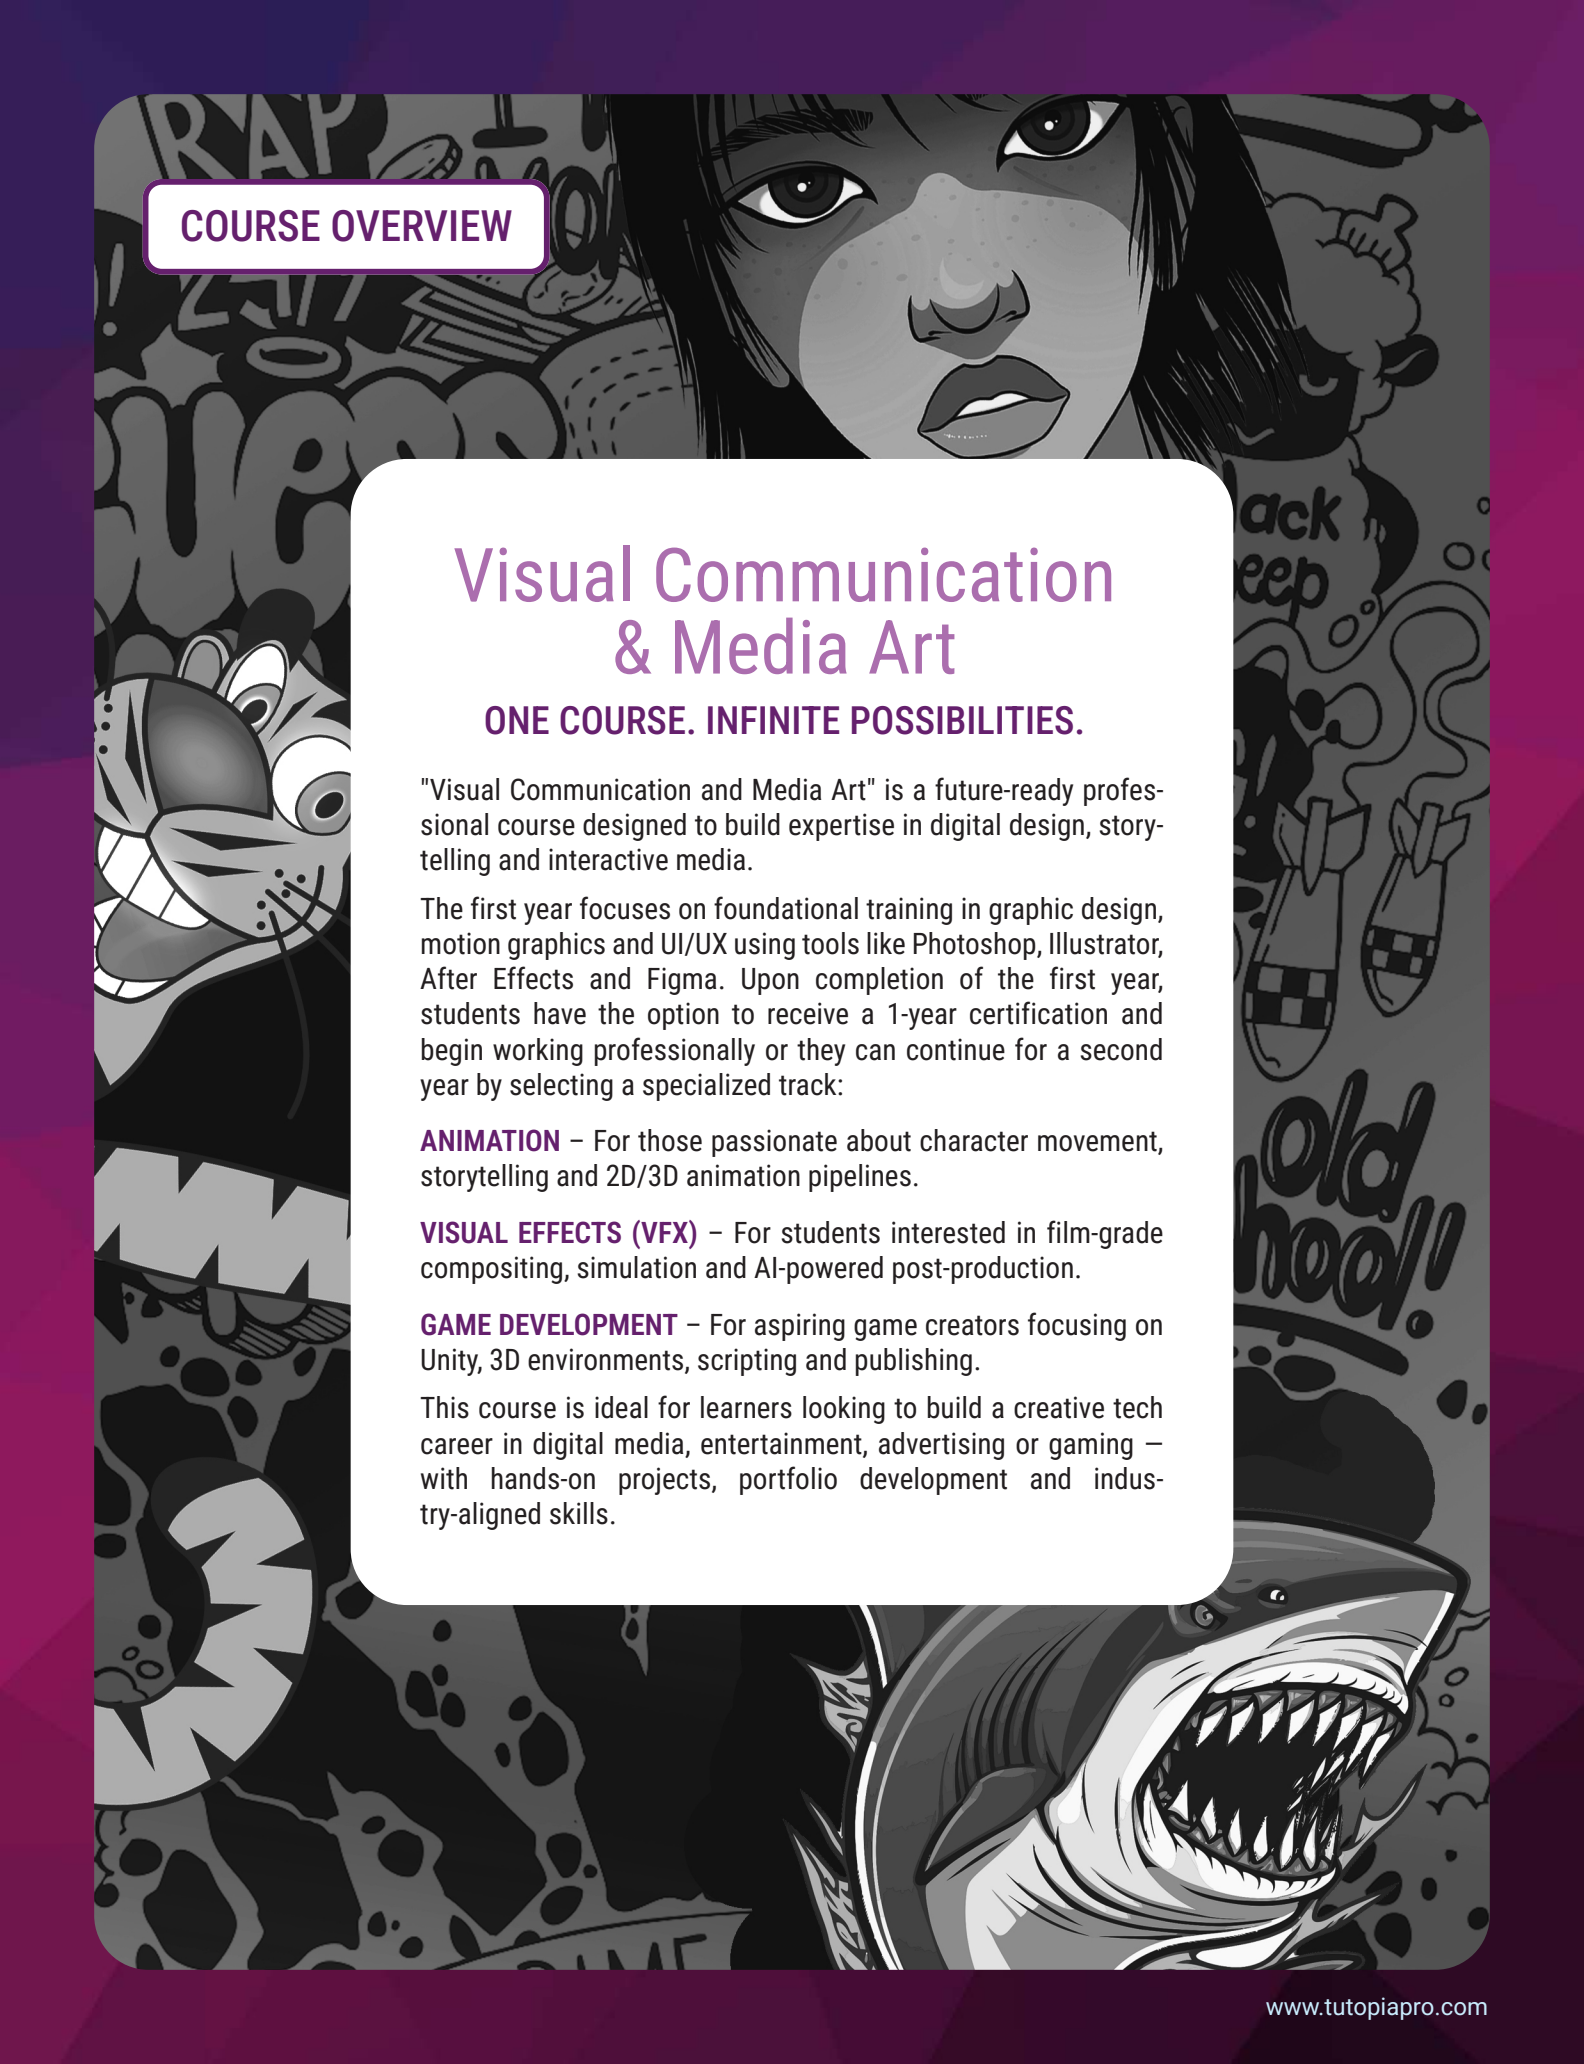

DAILY LEARNING TRACKING

The app not only syncs video tutorials with live class but also ensures students gain a deeper understanding through a short exam after each live session. This daily exam is mandatory for students to proceed to the next class, ensuring consistent learning and progress.

This process, widely adopted by leading educational institutions globally, is now at your fingertips with Tutopia-Pro. Join us in embracing this ideal method of teaching to unlock your true learning potential.

COURSE OVERVIEW

Visual Communication & Media Art

ONE COURSE. INFINITE POSSIBILITIES.

"Visual Communication and Media Art" is a future-ready professional course designed to build expertise in digital design, storytelling and interactive media.

The first year focuses on foundational training in graphic design, motion graphics and UI/UX using tools like Photoshop, Illustrator, After Effects and Figma. Upon completion of the first year, students have the option to receive a 1-year certification and begin working professionally or they can continue for a second year by selecting a specialized track:

ANIMATION – For those passionate about character movement, storytelling and 2D/3D animation pipelines.

VISUAL EFFECTS (VFX) – For students interested in film-grade compositing, simulation and AI-powered post-production.

GAME DEVELOPMENT – For aspiring game creators focusing on Unity, 3D environments, scripting and publishing.

This course is ideal for learners looking to build a creative tech career in digital media, entertainment, advertising or gaming – with hands-on projects, portfolio development and industry-aligned skills.

INDUSTRY EXPERTISE THAT POWERS YOUR FUTURE

Your talent deserves the spotlight. Learn from industry pros at Hi-Tech Animation—one of Eastern India's largest production houses with 1,000+ creative manpower. With a legacy of world-class work for Ed-Tech, broadcasters and top corporates, we train you for real-world success. Master industry-ready skills and unlock your future.

MENTORED BY HI-TECH ANIMATION. TRUSTED BY THE INDUSTRY.
